

# CEYLAN AKYOL

## Senior QA Automation Engineer | Playwright • TypeScript • AI-Assisted Testing

Vancouver, BC, Canada · [akyl.cyn@gmail.com](mailto:akyl.cyn@gmail.com) · [linkedin.com/in/ceylan-akyol](https://linkedin.com/in/ceylan-akyol)

### SUMMARY

---

Senior QA Automation Engineer with 8+ years of experience testing web applications end to end across banking, media, and enterprise software. Builds and owns automation frameworks in Playwright/TypeScript and Selenium/Java (BDD with Cucumber and Serenity), covering UI, RESTful and GraphQL APIs, and databases. Integrates AI tools (Claude, GitHub Copilot) into the QA workflow to generate test cases from acceptance criteria, draft automation scripts, and accelerate defect analysis. Extends quality coverage beyond functional testing with performance (k6, JMeter) and accessibility (axe-core) checks wired into Jenkins CI/CD pipelines. Strong foundation in test strategy, defect management (Jira, TestRail), and Agile-Scrum delivery.

### WORK EXPERIENCE

---

#### QA Automation Developer

Oct 2022 – Present

*CBC Radio-Canada | Toronto, ON*

- Lead implementation of a Playwright + TypeScript automation framework for a new project, extending coverage to accessibility (axe-core) and performance (k6) testing.
- Use AI tooling (Claude, GitHub Copilot) day to day: generating test scenarios and edge cases from acceptance criteria, drafting and refactoring test scripts, and speeding up log and defect analysis.
- Developed a BDD framework with Java, Selenium WebDriver, Serenity, and Cucumber, improving coverage and cutting repetitive manual regression effort.
- Own smoke and regression suites; analyze results, triage failures, and verify defects before they reach developers, following blocking issues to closure.
- Validate RESTful and GraphQL services with Postman and REST Assured as part of full-stack (UI, API, database) test coverage.
- Maintain the Jenkins CI/CD pipeline — build steps, deployment stage, notifications, and monitoring — with work tracked in Jira and Bitbucket.

#### QA Automation Engineer

May 2019 – Oct 2022

*Motus Bank | Toronto, ON*

- Implemented a Cucumber BDD framework with Java, Selenium WebDriver, JUnit, Maven, and the Page Object Model, including custom XPath strategies for dynamic elements.
- Delivered a full test mix for digital banking applications: smoke, regression, functional, positive/negative, database, and exploratory manual testing.
- Tested REST APIs with Postman and REST Assured; wrote SQL against Oracle and MySQL (and used JDBC) to validate data accuracy across applications.
- Designed test cases, scenarios, and scripts from business requirements; tracked defects in Jira through resolution and verified fixes before release.
- Contributed across all SDLC/STLC phases in Agile-Scrum, participating in sprint planning, estimation, and reviews.

#### Support & QA Specialist

Nov 2017 – Sep 2018

*Talya Bilisim | Antalya, Turkey*

- Performed and evaluated manual testing of enterprise applications before customer delivery; coordinated critical defects with the development team through to closure.
- Installed applications on customer servers and delivered onsite training and post-release support.
- Recorded technical service forms and user stories in CRM; participated in all Scrum ceremonies and presented weekly status reports.

### CORE SKILLS

---

**Automation & Frameworks:** Playwright, TypeScript, JavaScript, Selenium WebDriver, Java, Cucumber, Serenity BDD, JUnit, TestNG, Maven, Page Object Model, Katalon

**AI-Assisted Testing:** Claude, GitHub Copilot, ChatGPT — test case generation, script drafting, defect and log analysis

**API & Performance:** Postman, REST Assured, RESTful & GraphQL APIs, JMeter, k6; Accessibility: axe-core

**CI/CD & Version Control:** Jenkins, Bamboo, Git, GitHub, GitLab, Bitbucket

**Test & Defect Management:** Jira, TestRail, Azure Test Plans, Confluence; test planning, case design, execution, bug analysis & triage

**Databases:** SQL, MySQL, Oracle, JDBC

**Methodologies:** Agile-Scrum, SDLC/STLC, shift-left testing, offshore-onsite collaboration

CERTIFICATIONS

---

- Claude AI Certification — Anthropic
